

CERTIFICATE OF COMPLIANCE – ODC Declaration –

The Montreal Protocol on Substances that Deplete the Ozone Layer represents a landmark global agreement aimed at safeguarding the stratospheric ozone layer. It achieves this by mandating the gradual reduction and eventual elimination of the production and consumption of ozone-depleting substances (ODS). In alignment with this international commitment, the European Union has enacted Regulation (EU) 2024/590, furthering the EU's efforts to mitigate ozone layer depletion.

Nexperia B.V. hereby affirms that its semiconductor products are manufactured without the intentional inclusion of Ozone Depleting Chemicals (ODCs), in strict compliance with Regulation (EU) 2024/590. This adherence underlines our commitment to environmental stewardship and reflects our dedication to ensuring that the production of Nexperia's semiconductor products does not contribute to the degradation of the ozone layer. Additionally, Nexperia verifies that no ODCs listed in the Regulation are intentionally used at any of our manufacturing sites in the fabrication processes of our semiconductor products.

The undersigned certifies that, to the best of our knowledge, the statements provided above—including any data related to product composition—are accurate and valid. Nexperia has established rigorous systems to ensure that our products meet global environmental regulations and standards. However, it is important to note that not all materials used in Nexperia's products have undergone independent verification for substance content. Should any discrepancies or issues arise from the information contained in this document, Nexperia's standard terms and conditions of sale will prevail, except in cases where alternative agreements have been explicitly made in writing by both parties. Nexperia cannot guarantee that end products created by our customers, which incorporate Nexperia components, will consequently comply with the assertions made in this statement.
